

BREAKBULK EXPRESS

One consolidated shipment, a single entry gateway, zero hassle.

GET MORE DONE IN ONE SINGLE MOVE

DHL BREAK BULK EXPRESS is an international express door-to-door service for bulk shipments clearing customs as a single unit. The subsequent delivery of individual shipments is made within the same destination country, customs union or free trade block.

When you need your consolidated goods shipped through a certain entry gateway to minimise your landed costs, we can customise an operational set-up to seamlessly ensure that the individual shipments are still delivered to an end of day promise.

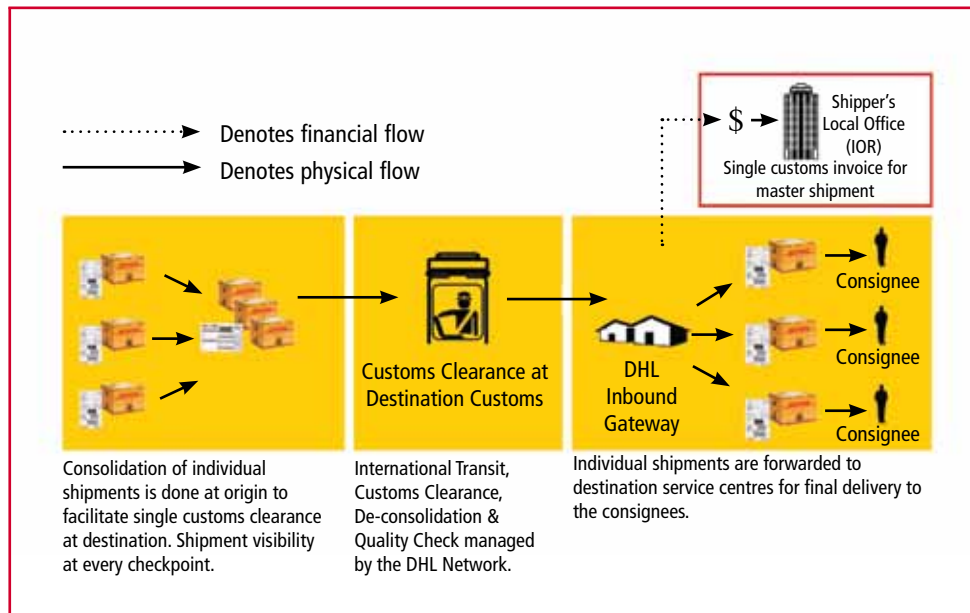

Hassle free and flexible. DHL BREAK BULK EXPRESS shipments are cleared whilst in the air, before the aircraft lands. And payment of duties, taxes and customs charges can be on the terms you choose.

Here's how DHL BREAK BULK EXPRESS minimises the hassle:

- Pickup of a single consolidated shipment
- Faster customs clearance at destination
- Direct distribution of deconsolidated shipments
- Door to door pricing
- Online, real time tracking of deconsolidated shipments
- Shipment preparation via our desktop EasyShip application
- Full control from end to end

BREAKBULK EXPRESS

DHL BREAK BULK EXPRESS DISTRIBUTION FLOW

SINGLE PICKUP, SINGLE CUSTOMS CLEARANCE, SINGULAR SERVICE

Here's how DHL BREAK BULK EXPRESS works:

- Individual shipment details are prepared using our EasyShip application. All the individual waybills are assigned to a single master waybill for the consolidated shipment.
- All shipment details are sent via an Electronic Data Interchange (EDI).
- Customs clearance is processed in the name of your selected Importer of Record.
- Once the consolidated shipment clears Customs at destination, it is broken down within the DHL Gateway facility.
- Individual shipments are then injected into the distribution network of the selected country or customs union, and delivered to final consignees.

A consolidated advantage:

- Save on multiple import/export customs clearance fees, duty and tax management costs.
- Neutral Delivery to an Importer of Record keeps inbound invoices confidential from final consignees.
- Save warehousing costs by avoiding the need to hold inbound shipments until final deliveries can be arranged.
- Better cash flow management.
- Time Definite end of day delivery promise.
- Easy access to shipment and invoice information.
- High service reliability, worldwide.
