DHL ONLINE SHIPPING

Designed for customers with internet access who send less than 50 shipments per month. This easy to use online tool is accessed through the DHL website.

What is DHL ONLINE SHIPPING?

DHL ONLINE SHIPPING is an innovative online shipping tool that helps you prepare documents, arrange collections, store contact details and track your deliveries. It is ideal for busy office managers, business travellers or receptionists who send low volumes of international shipments per month.

What can DHL ONLINE SHIPPING do?

- Help you to select the right service for each of your shipments
- Prepare air waybills and customs documentation online
- Book collections and track shipments online
- Save up to 300 customer addresses
- Access shipment records for 99 days
- Email pre-alert to your recipients and other interested parties

DHL ONLINE SHIPPING requires no special software or training, simply visit www.dhl.co.uk.

REQUIREMENTS: A DHL account number (beginning '13' or '18'), Email address, PC with internet connection. Your browser should have Javascript and cookies enabled.

DHL INTRASHIP

Designed to support customers where there is a need to have more than one person preparing shipments who, if required, can be more at more than one site.

What is DHL INTRASHIP?

DHL INTRASHIP is a comprehensive shipping solution that allows shipments to be processed from single or multiple locations. Orders can be processed easily from more than one site, all with access to the same data. Your shipments are processed online on the DHL web server, independently of the hardware and software used.

What can DHL INTRASHIP do?

- Prepare shipping and customs documentation
- Manage your shipping and customer data
- Arrange your booking collections by courier
- Email pre-alerts to your recipients
- Provide integrated shipment tracking
- Dedicated helpline to support you
- History management of all shipping orders and shipment reports.

DHL INTRASHIP is so simple to use that it requires little training and can be accessed 24 hours a day, 7 days a week.

REQUIREMENTS: A DHL account; Browser; Internet Access, Printer, Email

DHL EASYSHIP

Great for customers who prepare shipments and print labels in bulk, DHL EASYSHIP can be installed on customers' own equipment with options to enable a multi-user, networked configuration.

What is DHL EASYSHIP?

DHL EASYSHIP is an advanced and powerful shipment management tool for any organisation with large shipping volumes or regular scheduled deliveries. DHL EASYSHIP can handle the needs of multi-national supply chains or any business with a central shipping function. It's a Windows-based system, which is easy to use yet very powerful – enabling you to handle everything from regular mailshots to multi-stage shipping processes.

What can DHL EASYSHIP do?

- Provide streamlined shipment preparation and processing, from shipping labels to customs documentation
- Advanced shipment tracking: 24/7, real-time tracking of individual or multiple shipments, inbound or outbound
- Access to a range of shipment management tools
- Database management and maintenance
- Customised management reports
- Full technical support including training, documentation, help-desk and on-site maintenance are all provided at no extra cost.

DHL EASYSHIP has been designed by shipping professionals for shipping professionals.

REQUIREMENTS: A DHL account, PC with a Pentium III and internet connection; Windows 2000 or XP; Works with laser printers for hard copy labels and customs documentation, and thermal label printers.

DHL LINK EDI

Aimed at customers with large numbers of shipments to process who want to make shipping as efficient as possible. It enables customers to prepare DHL compliant labels and reports directly from their own warehouse management systems.

What is DHL LINK EDI?

Many customers prefer to use their warehouse / despatch management computer system for the production of all shipping documentation. The Link concept encompasses many combinations of hardware and software and is predominantly implemented by large volume shippers.

What can DHL LINK EDI do?

- Allows a customer full flexibility so they can completely control how they meet their shipping needs.
- Streamline the shipment preparation and processing to be as effortless as possible.
- Allow the tracking and shipment details to be known immediately by customer systems.
- Full technical support including consultation, documentation and support.

DHL LINK EDI upgrades express shipping from being an "outside service" to a total, fully-manageable link within your total business flow.

REQUIREMENTS: Various connection options supported through remote access environment: Internet dial-up (ISDN/PSTN), value-added network (VAN), X.400, X.25, etc.
